

SEED helps children develop connections between their brain and their behaviors.

SEED Hours

SEED is an 11-week program that utilizes a research-based curriculum. The program will run 3 days per week for 3 hours each day. A morning and afternoon session will be offered. SEED Space is Limited!
No Cost to Families
The SEED Center involves no fees to parents. It utilizes your insurance to offset the cost to families.

What are social emotional skills for 3 to 5 year-old children?

- Follow adult directions when asked the first time
- Stating their feelings versus using behaviors
- Child can calm from a tantrum in 7 minutes or less
- Child can easily separate from parent
- Child asks for help when needed
- Child can focus attention for 20 minutes
- Child can join in group activity

Social and Emotional Skills Supplement Your Child's Success Throughout His or Her Life

SEED emphasizes the *Emotional* and *Social Development* of your child while it supplements academic abilities. SEED's goal is to provide your child with the confidence to succeed in school and life.

EQ: Emotional Intelligence is a way of recognizing, understanding, and choosing how we think, feel, and act. It shapes our interactions with others and our understanding of ourselves. It defines how and what we learn; it allows us to set priorities; it determines the majority of our daily actions. Research suggests it is responsible for as much as 80% of the "success" in our lives.

By focusing on the emotional intelligence and social development, each child will gain the knowledge and skills to be successful in both school and in life.

SEED Child Development Center

"Social Emotional Enrichment & Development"
Planting the Seeds to Success

SEED is designed to provide your child with the social emotional skills needed for successful behaviors and expectations in daycare and school settings.

Focusing on the 3 R's of Emotional Development:

- Relationships
- Regulation
- Routines/Exploration

Social Skills: An identified social skill will be worked on each week, and information will be taught to children, as well as parents, so parents can help their child in the development of each skill.

Therapeutic Play: The children will participate in structured body and mind breaks to increase the child's ability to self-regulate and learn social spacing.

Team Building: Children will learn how to identify different emotions and how to express them appropriately, as well as learn how to recognize the emotions of others.

Individualized Attention: Time will be focused on each student's strengths as we develop and reinforce their identified areas of need. Each child will have an Individual Treatment Plan that will measure and determine progress.

Family Skills: This can be provided on a group and/or individual basis as needed to improve family functioning.
